About me

Passionate data analyst with a background in Business Administration and certifications in Business Intelligence, Digital Transformation, and analytical tools such as Python, SQL, and Tableau. I stand out for my ability to translate data into strategic insights that drive informed decisions. With skills in critical thinking, data visualization, and resource management, I seek to contribute to organizations' success through innovative and collaborative solutions.

If you'd like to know more about me, I invite you to visit my website where I showcase my certifications and projects.
